## REFERENCE CONSTRUCTION WORKS

# Bicycle and pedestrian bridge between St. Darum and Hovedvej 11, Bramming, Denmark

A new bicycle and pedestrian bridge is being constructed between St. Darum and Bramming, Denmark.

The project includes connecting the section with a bridge over Highway 11.

The bridge is made of Corten steel with a epoxy coating on the carriageway. The foundations, columns and abutments are constructed from concrete.

The work was carried out in 2023 and 2024.
