

REFERENZ HARBOUR CONSTRUCTION AND MARINE ENGINEERING

Harbour Wyk Föhr Island 1. construction phase

Upgrading of ferry pier 1 in the port of Wyk auf Föhr. The new construction will enable the separation of car and pedestrian traffic. Rehabilitation of the old jetty, some of which is in a state of disrepair, by means of sheet piling with tiebacks consisting of round steel anchors and grouted piles. Reinforcement of the transverse breakwater. Island construction site - complex work preparation. Driving of the coated dolphins with attachments welded on one side under high demands on accuracy.
